ANDRÉ REIS
Software Engineer

I love to build awesome web applications. Enthusiast about UX, mobile development, pilates, running and ~~cooking~~ eating.

I'm not attached to, but I often speak **Kotlin** (advanced), **C#** (advanced), **JavaScript** (intermediate).

Challenge me :)

EXPERIENCE

SENIOR SOFTWARE ENGINEER
NOV 2022 – **NOW**

PERSONIO.com – AMSTERDAM, NL
Kotlin, PHP, TypeScript, PostgreSQL, GitHub Copilot, Cursor, AWS, SQS, Datadog, Split.io, GitHub.

Responsibilities: Define and get buy-in for technical plan, build and ship scalable and secure solutions using controlled rollouts. Work together with CX to fix customer pain points. Continuously improve SLOs. Key contributor to several projects such as enabling blue collars to track time in factories, and implementing geotracking/geofencing policies.

Highlight: Migrate Projects functionality from monolith to microservice in less than 2 weeks without downtime.

TECH LEAD
OCT 2021 – OCT 2022

SENIOR SOFTWARE ENGINEER
JUN 2020 – SEP 2021

CarNext.com – AMSTERDAM, NL
.NET, Kafka, ElasticSearch, PostgreSQL, Kubernetes, AWS, RDS, DynamoDB, SQS, S3, Lambda, Grafana, Prometheus, GitLab, ArgoCD.

Responsibilities: Lead the team, set architectural standards, ensure quality across the development process (API design, testing, monitoring), and coach developers. Define and test data-driven experiments. Develop 15+ scalable and resilient microservices for the webshop orientation phase, applying CQRS and Domain Driven Design.

Certifications: Design Kafka integrations, Empowered Product Teams

Highlight: Use captcha and rate-limiting to prevent malicious use and limit costs.

SOFTWARE ENGINEER
NOV 2017 – MAY 2020

BEERWULF.com – AMSTERDAM, NL
.NET, ElasticSearch, Redis, SQL Server, Azure, Docker, New Relic, JMeter.

Responsibilities: Integrate webshop with third parties (Logistics, Banking) and Data Mesh. Improve Scalability and Resilience of the main funnel. Infrastructure and CDN management. Customize pipelines to improve DX.

Certification: Design Microservices (by Sam Newman)

Highlight: Reduce add-to-cart time by 80% using distributed caching.

SOFTWARE ENGINEER
JAN 2016 – DEC 2016

CONSULTING COMPANY – LISBON, PT
.NET, JavaScript, SQL Server.

Responsibilities: Rebuild legacy service that manages military pensions, in a newer version of .NET.

EDUCATION

MASTER + BACHELOR OF SCIENCE
2011 – 2017

INSTITUTO SUPERIOR TÉCNICO – LISBON, PT
ERASMUS+ @ AALTO UNIVERSITY - ESPOO, FI
Information Systems and Computer Engineering

Master: Software Engineering and Enterprise Systems

Publications: Conference paper and book chapter.

Highlight: Efficiently find super classes using MapReduce in master thesis.

SIDE PROJECTS

SOFTWARE ENGINEER
2017 – NOW

AMOM (Google Play)
React-Native, Typescript, Node.js, Redux, Socket.io.

Daily assistant for people with memory problems (such as Alzheimer and Dementia). AMOM creates a close relationship with our loved ones, to guide them throughout the day.

Highlight: Share tasks in real-time between devices using WebSockets.
